

VCH Infectious Disease Risk Screening Documentation in Cerner

Risk Factors for Antibiotic-Resistant Organisms

NOTE: VCH does not screen or isolate for VRE in any healthcare setting

If risk factor(s) identified, order and collect ARO swabs within 24 hours of admission:

Test to order	Risk Factor
MRSA & CPO	<ul style="list-style-type: none"> Healthcare outside of Canada within the last year Cerner will auto-order Contact Precautions
CPO	<ul style="list-style-type: none"> Household contact with known CPO in the last year Cerner will auto-order Contact Precautions
MRSA	<ul style="list-style-type: none"> All other risk factors listed

VCH Screening Swab Sites

*If MRSA & CPO screening indicated, collect one swab from each site(s) to test for both AROs

MRSA	CPO
<ul style="list-style-type: none"> Nares Perineum or rectal/ostomy* If applicable: <ul style="list-style-type: none"> Open wound(s)* 	<ul style="list-style-type: none"> Rectal/ostomy (fecal stained)* If applicable: <ul style="list-style-type: none"> Sputum/tracheostomy if coughing Urine if catheterized Open wound(s)*

Travel History

Does not automatically initiate isolation or require screening swabs. Used for information purposes and in the event of an emerging disease.

Risk Factors and Symptoms/ARO Surveillance

Risk Factors and Symptoms/ARO Surveillance
