

COVID DONNING GOWN & GLOVES with facial protection on

1. Same mask and eye protection should be worn between resident/client rooms and shared/common clinical spaces. Eye protection can include safety glasses, goggles, mask with attached visor or full face shield.

HAND HYGIENE

1. Clean your hands with alcohol based hand rub or soap and water.

Over the Head Gown with facial protection

1. Insert arms, hold the gown out at the neck with both hands, position gown under chin, tilt your head and chin up, carefully place gown over your head, taking care not to touch your facial protection.
2. In the event that your hands touch your facial protection clean hands.
3. Fasten ties at the waist covering your torso and back.
4. If wearing full face shield, remove shield by side strap, place on clean surface, don gown, replace full face shield only touching side strap. Clean hands.

GLOVES

1. Extend over the cuffs of the gown.
2. Keep gloved hands away from face and limit touching surfaces.
3. Change gloves as needed (e.g. visibly soiled, between contaminated and clean tasks)
