

Recommended PPE for Healthcare Workers in all Settings

- Perform a [point-of-care risk assessment \(PCRA\)](#) before all patient interactions.
- Healthcare workers who wear PPE must be trained in and understand proper donning and doffing practices.

Patient type	Patients without COVID		Patients with COVID symptoms, with a positive COVID test result, or with COVID risk factors where testing results are unknown	
	Setting/scenario	In clinical care area, including common areas and breakrooms	Performing any patient care	Performing direct patient care; no AGMP
PPE Type	Recommended PPE			
Medical mask	√	√	√	×
N95 respirator	×	×	×	√
Gown (disposable or reusable)	×	×	√	√
Gloves	×	×	√	√
Eye protection (disposable or reusable)	×	×	√	√

Legend: √ = Use the PPE type indicated × – Do Not use the PPE type unless indicated by a [PCRA](#)
