- N95 respirators are used with suspected or confirmed cases of airborne infections (e.g., pulmonary tuberculosis, chicken pox, disseminated shingles, measles). A seal-check must be done each time an N95 respirator is worn.
- Apply N95 respirators before entry to the residence and remove after exit
- Perform hand hygiene before putting on & immediately after taking off N95 respirator

Droplet Precautions

- Put on and take off PPE inside the client's residence
- Maintain a minimum 2m (6 feet) distance from the client while putting on and removing PPE

Contact Precautions

Put on and take off PPE as per Point of Care Risk Assessment

Note precautions may be used in conjunction for organisms that transmit by more than one route (e.g., Droplet and Contact Precautions or Airborne and Contact Precautions). Refer to the <u>VCH IPAC Diseases and Conditions Table</u>.
