

## **Infection Prevention and Control**

## **Wound Care Guidelines in Long-Term Care & Assisted Living**

Classac C. a. adama	
Storage of wound care	<ul> <li>Clean and sterile supplies are stored in controlled, designated clean supply</li> </ul>
supplies	areas.
	<ul> <li>Depending on the needs of the site, clean and sterile supplies can be</li> </ul>
	stored in:
	■ a dedicated, lockable wound cart (like a medication cart)
	■ a dedicated room for storage of clean and sterile supplies
	a cupboard, in a dedicated low traffic area.
	<ul> <li>Stock minimal supplies.</li> </ul>
	<ul> <li>If a Wound storage cart is used, it shall not enter the resident room.</li> </ul>
	<ul> <li>Care plans are placed in a plastic cover when taking into the resident</li> </ul>
	room, clean and disinfect following use.
	Bring only the required dressing supplies into the resident room.
	<ul> <li>Containers should not be used to hold supplies going into resident room.</li> </ul>
	Extra or unused supplies DO NOT go back to the wound care
	storage cart or supply room.
	<ul> <li>Extra or unused supplies should be stored in the resident room, in a</li> </ul>
	re-sealable bag that is labelled with the resident's name.
	<ul> <li>Dedicate wound cleansing solutions.</li> </ul>
	<ul> <li>See Storage of Clean and Sterile Supplies</li> </ul>
Storage of wound	See Prevention of Wound Infection –Saving Dressing Pieces, When to Use &
dressing product from no	How to Save
touch technique/clean	
	Save in a sterile container or resealable bag.
technique	Saved dressing(s) pieces are only kept for 2 weeks; after that time
	discard the container or bag and any remaining dressing pieces.
	• Label the re-sealable bag with the resident's name, date opened and expiry date.
	<ul> <li>Store all used supplies in the resident room in a covered box that is</li> </ul>
	labeled with the resident's name.
Management of cleaning	
Management of cleaning	Normal saline:
solution	Discard dedicated Normal Saline after 24 hours.
	Label opened normal saline bottles with the resident's name and date
	the bottle was opened.
	For specialized solutions, follow manufacturer's instructions on the
	product label. See <u>Product information sheets</u>
Treatment Wound Binder	<ul> <li>Each resident with skin &amp; wound should have a treatment sheet.</li> </ul>
	<ul> <li>Each resident to have an updated treatment sheet.</li> </ul>
Mobile Work	In the absence of a clean work surface in the resident room, a dedicated
Surface/Utility Table	mobile work surface or utility table can be used.
	The mobile work surface/utility table SHALL NOT be used to store clean
	and sterile supplies.
	The mobile work surface/utility table may be brought into the resident
	room.
	The mobile work surface/utility table is cleaned and disinfected after
	every use, is labelled as "CLEAN" and place in a dedicated storage area.
