

IPAC Guidance: Portable Fan Use

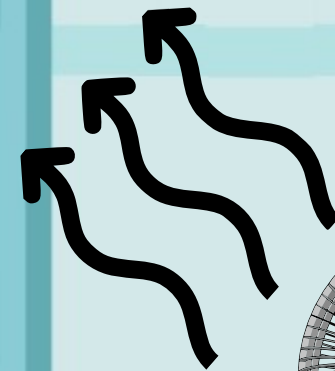

Clean and disinfect fans prior to first use, weekly, and when visibly soiled.

Aim fan towards ceiling, avoid aiming directly at the resident.

Avoid having fans move air from one resident to the next.

Turn off fans during care and room cleaning by EVS.

Place fan on a clean, dry, uncluttered surface.

To increase air circulation, avoid pointing fan towards door or hallway.

Note: Please contact IPAC for guidance during additional precautions, clusters, and outbreaks.
