

Pre-Season Planning:

Action	Done	Initial	Comments
1. Identify the outbreak lead (i.e. PCC/RCC) Name:			
2. Date seasonal planning reviewed:			
3. Declutter unit(s)			
4. Review stock of supplies (signage, culture containers, labels, requisitions) and order more as required.			
5. Place GI Outbreak materials in accessible location for staff to access when an outbreak is suspected. Refer staff to VCH IPAC website for resource materials.			
6. Review GI Outbreak IPAC procedures and policies with staff and ensure information is current.
