# Stand Alone Assisted Living Viral Gastrointestinal (VGI) Toolkit

This toolkit provides guidance related to viral gastrointestinal illness (e.g., Norovirus, Rotavirus, Adenovirus). Outbreaks are not called for stand-alone Assisted Living sites.

Residents identified with new symptoms consistent with Viral GI
Identify residents with other reasons for loose stool (i.e., loose stool as their baseline, recent laxative use or antibiotics in the last 3 days)

#### **GI Case definition**

- 2 or more episodes of diarrhea (Bristol stool chart 6 or 7) within a 24-hr. period, above what is considered normal for that individual (and not related to bowel stimulants) **OR**
- 2 or more episodes of vomiting within a 24-hr. period, **OR**
- 1 episode each of vomiting and diarrhea within a 24-hr. period, OR
- 1 episode of bloody diarrhea, OR
- lab confirmation of a known enteric pathogen with at least one symptom compatible with a GI infection (e.g., nausea, vomiting, diarrhea, abdominal pains, bloody stools or tenderness)
